

## Blanco Minerals Has Revised IPO Date Approved

Thursday, November 17, 2022 - Vancouver, BC; Blanco Minerals Inc. today confirms that the company has been granted regulatory approval for the company's shares to list as an IPO on the New York Stock Exchange on the revised date of Tuesday, December 20, 2022. The decision to revise the listing from December 8, 2022 was made to ensure our private equity partners had time to complete the registration process of issued pre-IPO shares.

By the latest date of Monday, December 12, 2022 the full prospectus for the IPO will be distributed to all of the company's shareholders and made available to the public by the IPO underwriters at Barclays Capital Inc. and Credit Suisse USA. In order to present the IPO to institutional investors in the global financial industry, the underwriters will begin the IPO road show on Tuesday, December 13, 2022.

The underwriting managers are reporting to Blanco Minerals' executives that the final pricing of the IPO, that will be announced 1-2 days before the listing, will be at least in the USD \$20.00 - \$25.00 per share range. Due to the extremely strong demand in all areas of lithium related equities markets, it is agreed among the analysts working on the IPO that Blanco Minerals' share price will remain strong in the months following the IPO. The projected steady company growth and production expansion at Blanco Minerals Inc. for the next 5-10 years should allow the share price to rise consistently in the long term.

Peter Ross, CEO of Blanco Minerals stated today, "The company's board, directors and shareholders now wait with excitement as the underwriters make the final preparations of bringing the IPO to market. We are all certain that the road show will see the IPO shares become oversubscribed because there is a huge demand for lithium equities from investors of all levels. Our shareholders shall be delighted to hear that the share price is projected to be well over \$20.00 when the stock goes public."
